

Who cares about toilets?

3.6 billion people do. Because they don't have one.*

If you have a toilet, thank it for these nine reasons:

- 01.** Taking away our pee and poo.
- 02.** Keeping human waste out of our water and food chains.
- 03.** Maintaining our dignity.
- 04.** Protecting us from killer diseases like cholera...
- 05.** ...and helping reduce malnutrition...
- 06.** ...which helps keep children in school...
- 07.** ...and when there are toilets at school, girls don't have to stay home while they're menstruating...
- 08.** ...and the same goes for having decent toilets at work and in all other places.
- 09.** And finally, we can thank toilets for creating lots of jobs. Sanitation systems need people to run them, 24/7, 365, forever.

*3.6 billion people don't have access to a safely managed sanitation service. (WHO/UNICEF 2021)
